# 10 years together, a solid base for a successful future...

...thank you from the FGL International team

FGL International celebrates 10 years of activity devoted to develop innovative technical products and solutions for its clients in more than 32 countries worldwide. On 07/06 the team took part to a special celebration event at Antinori Winery in Florence.

In this occasion we remembered the ten past years of intense work of every single member of our staff and we proudly confirmed our intention of achieving even more ambitious goals in the future, in order to give the best service with high quality products to all our clients worldwide, whose satisfaction is always our main target.

"Tannery is our core business" is the philosophy inspiring all the activities and commitments of FGL International.

FGL International always uses innovations and new technologies to suggest to its clients specific solutions based on skilled technical assistance, in the total respect of the environment.

Advanced leather technology, technical support to its clients and environment friendly solutions: these are our main targets.

# Fabbriche Aperte. Schools go into the companies of the Lapi Group.

On May 13 and 14 the four companies of the Lapi Group dealing in the chemicals field – FGL international, Figli di Guido Lapi, Toscolapi and Finikem – attended again to the event called Fabbriche Aperte (Open Factories) dedicated to the students of the Technical Institute Cattaneo of San Miniato, chemical orientation. Fabbriche Aperte is an initiative promoted by Federchimica already joined by the above mentioned companies in 2011, when it was celebrated the International Year of Chemistry. Students and teachers were guided into the different departments of the hosting companies by the qualified staff, who illustrated to the students the most important characteristics of what they were seeing. They had the opportunity to visit the R&D laboratory, the experimental tannery, the production department and the warehouse of the four companies and to see directly the world of work.

The experience was really constructive and appreciated both by the students, who were very interested and made a lot of questions, and by the teachers, who think that such experiences are very helpful for the formation and growth of the young people. But also the authorities appreciated it, the Mayor Gabriele Toti and the School Councilor, Ida Vanni, of Castelfranco di Sotto attended the event and spent compliments with the Lapi Group managers for organizing that happening.

This year Fabbriche Aperte is only one of the initiatives proposed by the Companies of Lapi Group. Included in the “Progetto Giovani”, that is a project dedicated to young people, other two initiatives have been planned: the first named “Rispetto a ..... chi?” realized together with the Lions Club of San Miniato and the AUSL 11 of Empoli, which involved two secondary schools of the area (9 classrooms, about 220 boys and girls) and it will be proposed again next year to other schools. Through activities with both recreational and educational aspects conducted by Nature-Rock it was intended to teach the importance of respect, particularly in the group. The second initiative was related to sport: it was organized a football tournament together with the sport association C.C. Romano Srl, the “Lapi Group Tournament” dedicated to the professional “Giovanissimi B”, born in 2001, which took place in their football field on May 31, June 1 and 2, 2014.

During the tournament an “ethic code” was given to the sport teams, particularly realized for the fair conduct in the sport.

With that Project dedicated to social themes the companies of the Lapi Group aimed to give a contribution to the growth of the young people investing on their education, convinced that the young people of today with the right edification will be better men of tomorrow.

Students of the “Istituto Tecnico Cattaneo” - San Miniato

# FGL International

Auxiliary chemical tanning products with a high added value.

FGL International produces auxiliary chemical tanning products with a high added value. A passion for new solutions to improve the tannery sector, the unquestionable technical skills of its professionals, the experience built-up in the field, a highly qualified R&D department and dedicated on-site service are what have led leather manufacturers to choose FGL International as their ideal business partner. FGL International has a flexible production structure composed of qualified professionals designed to operate efficiently on the various international markets. Management of the departments is fully computerised and complies with UNI EN ISO 9001:2008 standards for which the company has been certified since 1999. This system controls every aspect of business from administration to

marketing, research, production, warehouse inventories and customer assistance while also assuring safety in the workplace. Flexibility is the key feature based on 2 basic principles:

- 1) The availability of a fully-stocked warehouse
- 2) The ability to satisfy customer's needs promptly, all over the world
