UNI EN ISO 9001:2008

Loving tannery means spreading knowledges and innovations to all.

FGL International, “Silver sponsor” in support of the
XXXIII IULTCS 2015 international congress to be held on
november 24st - 27st, 2015 in Novoamburgo - RS, Brazil

At FGL International we are constantly investing in our Research and Development programs, our laboratories and our personnel, to meet and surpass the ever more challenging demands of today's Environmental protection and Ecological Sustainability. With our limitless passion for knowledge, constant personnel training, testing of all aspects of our leathers and chemicals products, we are able to innovate quickly and to adapt these technologies into our production. Our customers are the key stones of our organization, their needs and satisfaction is not enough for us. Our innovation and novelty leaves them impatient and wanting more. We strive to assist in every way, we give our hearts, our passion and our knowledge. We blur the line of the conventional and of the unconventional to achieve the best for our clients. We live in an era of science, innovation, of advancement of all technologies – why should leather not also? Few companies have the desire to share their knowledge, scared in this world of global competition, our strategy is different, we learn and then spread our knowledge, these are the reasons why FGL International has decided to participate as a “Silver Sponsor” in support of the IULTCS 2015 international congress to be held in November in Brazil, where the leading experts in our sector will gather and present their technical and scientific research. FGL International considers this event to be of the highest importance, creating an environment where active exchange of information, knowledge and new technologies generate excellence.

**XXXIII IULTCS
CONGRESS**

International
ITALIAN LEATHER TECHNOLOGY

RELAX!

PERMASOL TFR IS STILL THE MOST EFFECTIVE AUXILIARY AGAINST FORMALDEHYDE.

10 years ago FGL International introduced the revolutionary auxiliary to eliminate free formaldehyde during the wet tanning phase. After years the tanning market is confirming that Permasol TFR is still the most effective auxiliary. You can relax and keep preferring the solution developed by the company who first formulated it. You don't need to modify your standard process, just use Permasol TFR, the auxiliary which eliminates free formaldehyde.

Permasol TFR

THE AUXILIARY WHICH ELIMINATES FREE FORMALDEHYDE.

PLUSES

Selective reaction into the leather
Converts aldehydes in neutral compounds
Eliminates the free formaldehyde
Easy to use

PROPERTIES

Does not degrade dyes
Does not produce bad odours
Does not change the softness or other characteristics of the finished product

FGL International, sponsor of Challenges 2° World Leather Congress

Fondazione Edison Milano, 8th September 2015

FGL International is one of the main sponsor of the 2nd World Leather Congress, organized by UNIC (Italian Tanners' Association), scheduled to be held in Milan on Tuesday 8th September at the Fondazione Edison (Foro Bonaparte 31). This is an important event for an

exchange of ideas among the companies and firms represented. Industrialists upstream and downstream of the supply chain, from tanners to producers of items in leather, producers of technology and chemicals, representatives from the institutions, from state and private

organizations and academics will be called on to give their contribution for the future of the industry, with an analysis of the more sensitive issues. FGL is as always close to the people who care about leather.

FGL International keep on Sustaining Research

www.aicc.it

Sustainability and technological innovation for the future of tanning field was the subject of the 43° Convegno Nazionale dell'Associazione Italiana dei Chimici del Cuoio, (the 43° National Meeting of AICC), held on June 12th in San Miniato where more than

100 people were present. The engagement in researching "eco-friendly" processes and products has always been a main target for FGL International S.p.A. and from year to year the company is devoting resources in Research & Development to improve

the performances of the products put on the market, always respecting the environmental norms. FGL International, becoming main sponsor of the AICC meeting, once more demonstrated the value given to the scientific research in the Tanning Chemistry.

FGL International

Auxiliary chemical tanning products with a high added value.

FGL International produces auxiliary chemical tanning products with a high added value. A passion for new solutions to improve the tannery sector, the unquestionable technical skills of its professionals, the experience built-up in the field, a highly qualified R&D department and dedicated on-site service are what have led leather manufacturers to choose FGL International as their ideal business partner. FGL International has a flexible production structure composed of qualified professionals designed to operate efficiently on the various international markets. Management of the departments is fully computerised and complies with UNI EN ISO 9001:2008 standards for which the company has been certified since 1999. This system controls every aspect of business from administration to

marketing, research, production, warehouse inventories and customer assistance while also assuring safety in the workplace. Flexibility is the key feature based on 2 basic principles:

- 1) **The availability of a fully-stocked warehouse**
- 2) **The ability to satisfy customer's needs promptly, all over the world**
