Dyes... to be framed.

FGL International's sense of dyes becomes an exhibition.

Giallo GV, Verde SC, Scarlatto RX, Violetto, Turchese HDA, Bruno TK, Arancio 6H e Bordeaux Brillante... A veritable feast of colours, a “chromatic passion” is being

experienced at FGL International. A passion which has also involved the employees of the company who with excitement and team spirit have accepted

to be photographed for “Happy Dyes”, the 2017 version of the traditional desk calendar.

The evolutionary process of the company,

always committed to continuous research into technological innovation to offer its clients, is fully apparent in the new release of the range of dyes of high technical value Valanil, Valalux and Valasoft which in 2017 has reached even more high-performance

levels so that each skin obtained can be considered a veritable work of art. FGL International therefore presents DYES ... TO BE FRAMED an exhibition in which the 70 main colours of the swatch card are shown in individual frames.

“With DYES...TO BE FRAMED we want to prove to tanners that high quality standard can be maintained only by continuing to invest in research and innovation” says Eligio Stoppa of FGL International, thus reiterating once more the absolute

DYESTUFFS

The **VALANIL** and **VALALUX** colour cards now also have a new look, but not only: they have been implemented with dyes carried out on metal-free leather, another advantage for our customers who now have a far better selection to choose from for dyeing metal-free leather and white vegetable tanned leather in general.

The colour card of the new **VALANIL E** line, which includes a small but select range, offers great value for money.

The new **VALASOFT** colour card is presenting a series of dispersed dyes with which particularly uniform, in other words, 'soft', pastel shades can be created. Moreover, with the Valasoft line it is also possible to make corrections to any colours inside the vats without running the risk of causing stains.

Once again, FGL International is “illuminating” the tanning sector with its new and innovative proposals by making its technical skills, research and know-how available to all its customers.

METAL FREE calf (Releasys®)

dedication of the company that produces chemical products for the tanning sector.

ECOSOFT ULX

The Zero line's new entry.

A new product has been added to the well proved ZERO line of eco-compatible retanning agents. ECOSOFT ULX is the new Softening Polymeric Retanning agent; it is the result of the research carried out by FGL International laboratories which increases the potential to produce the full range of articles on demand, from shoes upper leathers to garment leathers, all free of phenols or of free formaldehyde.

ECOSOFT ULX

Retanning softening polymer

ECOSOFT 1001

Retanning polymer/vegetable at high filling properties for dyed articles

ECOSOFT 1002

Retanning polymer with high molecular for very full leather with very good lightfastness

POLISOFT 200W

Retanning softening polymer with outstanding lightfastness

LECOREN LTX

Softening polymer with good light fastness

PERMASOL KMT

Softening polymer with very good softening properties and good light fastness

IDROSIN HA 11-F

Softening polymer with high filling effect and good lightfastness

ECOSINT 300W

Retanning polymer in powder form for high filling effect and very tight grain with extremely good lightfastness

FGL International

Auxiliary chemical tanning products with a high added value.

FGL International produces auxiliary chemical tanning products with a high added value. A passion for new solutions to improve the tannery sector, the unquestionable technical skills of its professionals, the experience built-up in the field, a highly qualified R&D department and dedicated on-site service are what have led leather manufacturers to choose FGL International as their ideal business partner. FGL International has a flexible production structure composed of qualified professionals designed to operate efficiently on the various international markets. Management of the departments is fully computerised and complies with UNI EN ISO 9001:2008 standards for which the company has been certified since 1999. This system controls every aspect of business from administration to

marketing, research, production, warehouse inventories and customer assistance while also assuring safety in the workplace. Flexibility is the key feature based on 2 basic principles:

- 1) The availability of a fully-stocked warehouse
- 2) The ability to satisfy customer's needs promptly, all over the world
