The power of dyes.

TRY OUR RANGE OF HIGH TECHNICAL DYESTUFFS!

VALANIL® COMPLETE RANGE **VALALUX®** METAL COMPLEX SELECTION **VALASOFT®** DISPERSE DYES

Strong or soft colors, saturated or delicate colors, shocking or pastel ones. Each color, thanks to its wavelength, affects emotions and acts on the whole body. Nothing but pure physics! The complete and exciting range of FGL International dyes is a source of

inspiration and involvement for its employees in the realization of the 2018 calendar's images. FGL International proposes an updated version of its RANGE OF HIGH TECHNICAL DYESTUFFS

ranging from the complete range of VALANIL to VALALUX metal complex selection, to finish with the VALASOFT line dispersed dyes. An even more

performing and versatile range to increase the effectiveness of dyes on different hides and to facilitate tannery work. The Italian leather technology's support also offers

specific customer assistance thanks to its qualified technicians who are available to explain every technical characteristics and improve their performance on leathers.

TRY OUR RANGE OF HIGH TECHNICAL DYESTUFFS!

VALANIL® **VALALUX®** **VALASOFT®**
 COMPLETE RANGE METAL COMPLEX SELECTION DISPERSE DYES

The VALANIL and VALALUX colour cards have been implemented with dyes carried out on metal-free leather, another advantage for our customers who have a far better selection to choose from for dyeing metal-free leather and white vegetable tanned leather in general. The colour card of the new VALANIL E line, which includes a small but select range, offers great value for money.

The new VALASOFT colour card is presenting a series of dispersed dyes with which particularly uniform, in other words, 'soft', pastel shades can be created. Moreover, with the Valasoft line it is also possible to make corrections to any colours inside the vats without running the risk of causing stains.

The future starts now.

Discover our new 'AU line' for automotive industry.

The Automotive leather industry has reached very high standards in terms of environmental impact and “clean” technology, thus FGL International has developed its new range of Automotive Auxiliaries based on the latest requirements coming from the market.

At FGL International, we take very seriously the new challenges; this is why we believe our “AU” line will be a step ahead for the leather car interiors and avionic industry, where performances and style will be main issues and will make the difference in terms of environmental sustainability and quality.

FGL International’s highly skilled technical staff is ready to give all our clients worldwide all the support in achieving outstanding results through the best application of our new “AU” line.

Very high standards in terms of research and development for FGL International.

FGL International has always been committed to quality management in order to achieve very high standards in terms of research and development, with great effort to create its own internal policy where products have to comply with the latest environmental regulations. Moreover, FGL International’s whole internal organization is directly involved in promoting a real culture of the safety conditions in every stage of the production process, in order to remark once again that human resource are extremely important for the success of a company.

FGL International SpA is proud to announce to have finished the onboarding process to join the ZDHC Roadmap to Zero Programme. The official announcement will follow in April. FGL International SpA registration to the ZDHC Gateway has been approved on November 2017.

FGL International

Auxiliary chemical tanning products with a high added value.

FGL International produces auxiliary chemical tanning products with a high added value. A passion for new solutions to improve the tannery sector, the unquestionable technical skills of its professionals, the experience built-up in the field, a highly qualified R&D department and dedicated on-site service are what have led leather manufacturers to choose FGL International as their ideal business partner. FGL International has a flexible production structure composed of qualified professionals designed to operate efficiently on the various international markets. Management of the departments is fully computerised and complies with UNI EN ISO 9001:2008 standards for which the company has been certified since 1999. This system controls every aspect of business from administration to

marketing, research, production, warehouse inventories and customer assistance while also assuring safety in the workplace. Flexibility is the key feature based on 2 basic principles:

- 1) The availability of a fully-stocked warehouse
- 2) The ability to satisfy customer's needs promptly, all over the world
