Valanil (complete range), Valalux (metal complex range), Valasoft (dispersed dyes) and Valanil E can be detected with the new DDC (Dyestuffs Digital Catalogue).

Dyes can be selected depending on the type of leather in real-time, combining an immediate solution from the technical staff as well, in order

to get the best result out of it. DDC is a quick and simple tool with one recommendation: colors shown on the site are computer simulations of the FGL International dyestuffs and may not match the identified color standards. Always consult FGL International dyes color charts to evaluate any result before use.

# FGL International is proud to be diamond sponsor of Challenges 3° World Leather Congress

29 August 2017, Hotel Pullman Shanghai South, Shanghai, China

FGL International is proud to be one of the Diamond sponsors of the 3rd World Leather Congress, scheduled for 29 August 2017 in Shanghai, on the eve of All China Leather Exhibition (30 August – 1 September 2017) and organized by Taiwanese International Leather Association (TILA), who, through Richard Pai, currently holds the Presidency of International Council of Tanners (ICT), and by China Leather Industry Association (CLIA). The Congress participants are tanneries representing 37 Countries from Europe, America, Asia and Africa. The leather industry has a very important role in international business and this congress will explore its great

developments and improvements in environmental responsibility and sustainability, technology advancements and other related issues, focusing on how the leather industry will respond to current and future challenges. FGL International is constantly engaged on this front, without losing sight of its target represented by the customer and its demands satisfaction. FGL International has always supported the disclosure of technological, scientific and innovation knowledges, offering itself as sponsor of the major initiatives in this field. Not by chance, FGL International decided also this time to be one of the Diamond sponsors of the third

World Leather Congress, the place where the field leading experts meet and where excellent scientific and technical research works are presented. FGL International believes that this event is a qualified context where activating the exchange of knowledges on new technologies having the environment as protagonist of excellence.

# FGL International

Auxiliary chemical tanning products with a high added value.

FGL International produces auxiliary chemical tanning products with a high added value. A passion for new solutions to improve the tannery sector, the unquestionable technical skills of its professionals, the experience built-up in the field, a highly qualified R&D department and dedicated on-site service are what have led leather manufacturers to choose FGL International as their ideal business partner. FGL International has a flexible production structure composed of qualified professionals designed to operate efficiently on the various international markets. Management of the departments is fully computerised and complies with UNI EN ISO 9001:2008 standards for which the company has been certified since 1999. This system controls every aspect of business from administration to

marketing, research, production, warehouse inventories and customer assistance while also assuring safety in the workplace. Flexibility is the key feature based on 2 basic principles:

- 1) The availability of a fully-stocked warehouse
- 2) The ability to satisfy customer's needs promptly, all over the world
