UNI EN ISO 9001:2008

The quality of leather for the automotive industry starts from the wet-process. FGL International knows it well.

**OUR ATTITUDE
FOR AUTOMOTIVE**

'AU LINE' NEW RANGE OF AUXILIARIES FOR AUTOMOTIVE LEATHER INDUSTRY.

This is the reason why we have developed the new range of leather auxiliaries for the automotive and aerospace industries.

The Automotive Leather Industry has reached very high standards in terms of environmental impact and "clean" technology, thus FGL International has

developed its new range of Automotive Auxiliaries based on the latest requirements coming from the market.

At FGL International, we take very

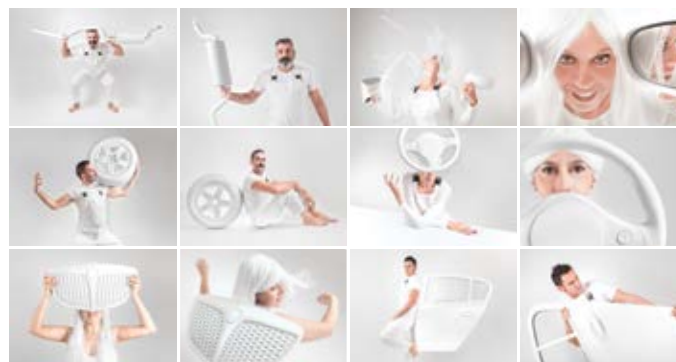

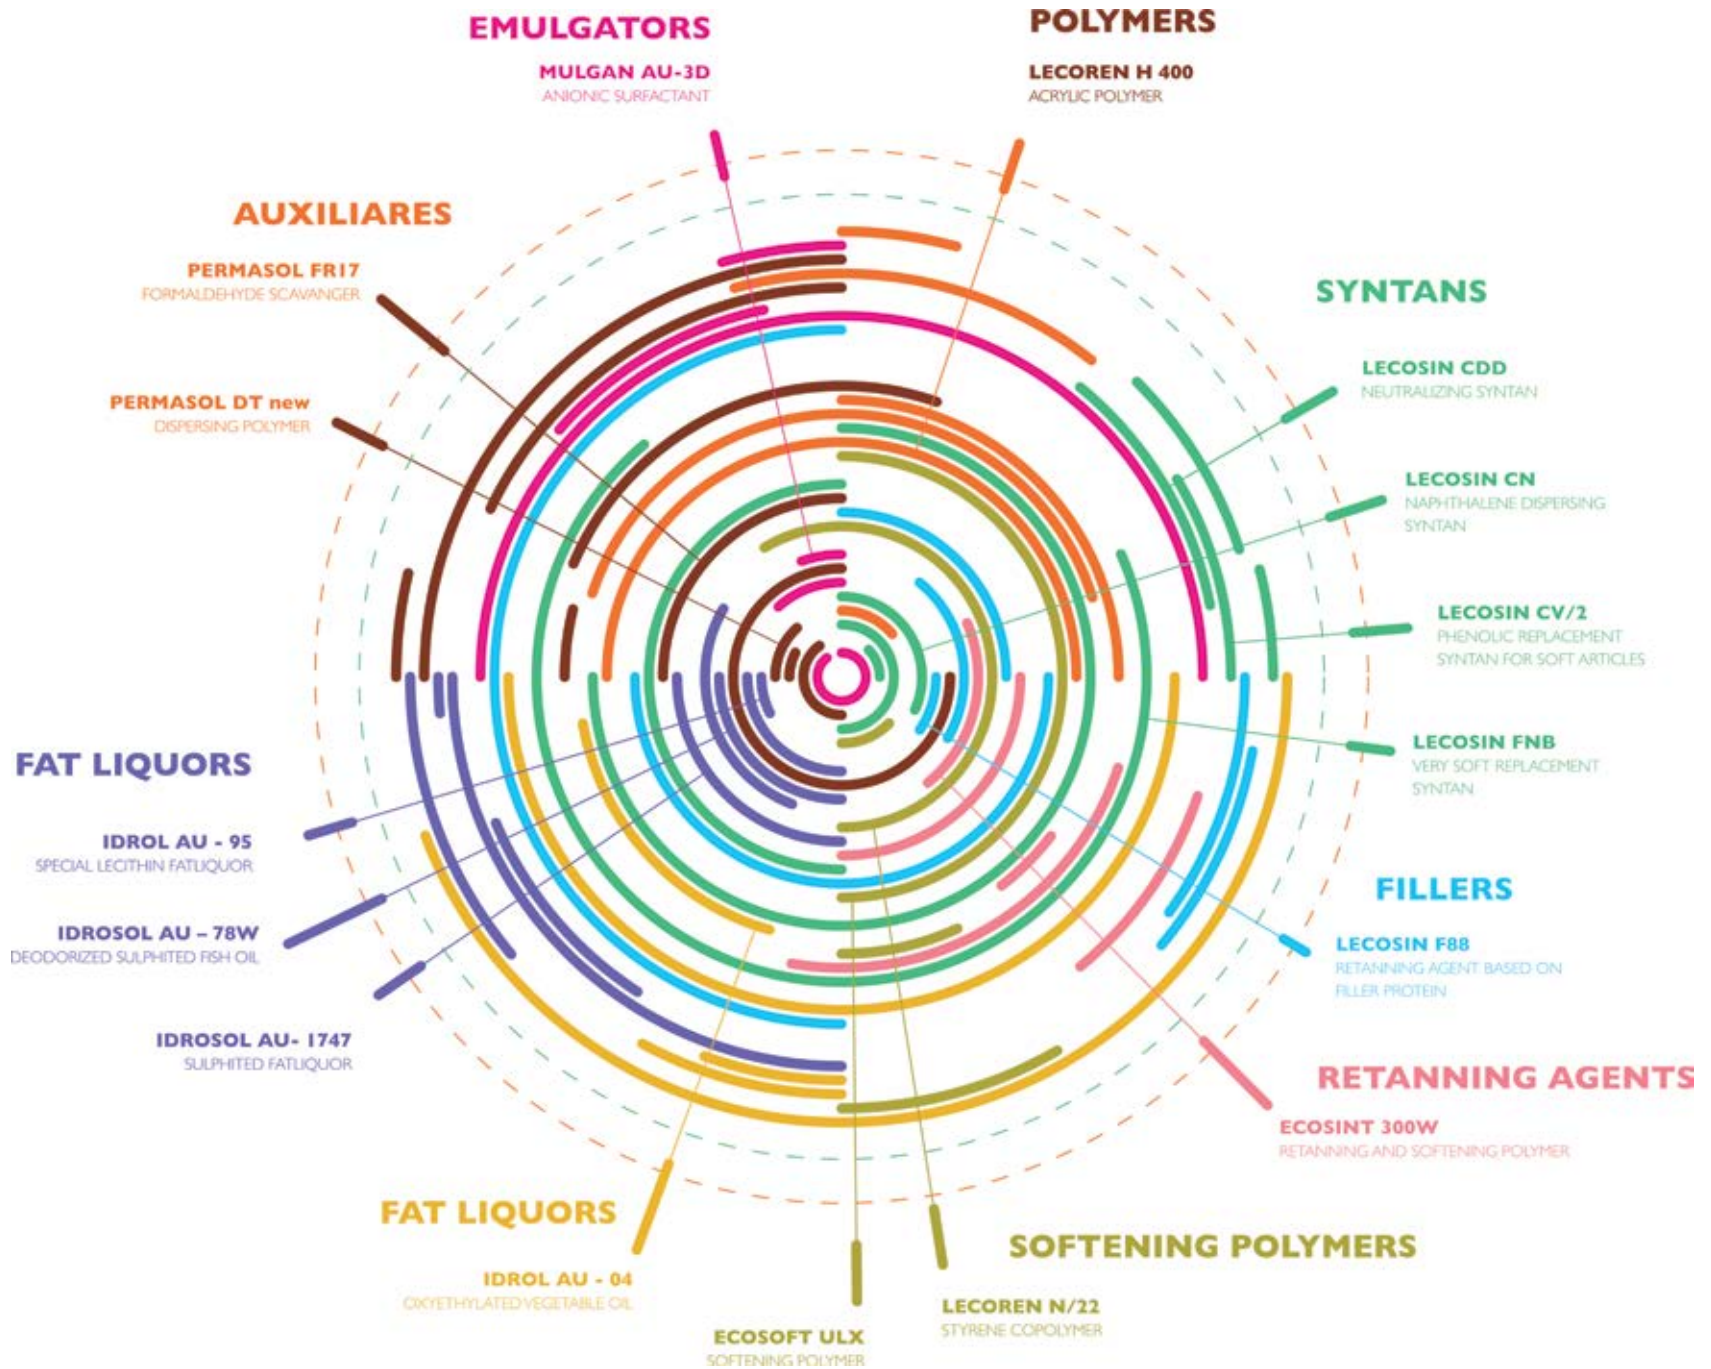

seriously the new challenges; this is why we believe our AU line will be a step ahead for the leather car interiors and avionic industry, where performances

and style will be main issues and will make the difference in terms of environmental sustainability and quality. FGL International's highly skilled

technical staff is ready to give all our clients worldwide all the support in achieving outstanding results through the best application of our new AU line.

NEW RANGE OF AUXILIARIES FOR AUTOMOTIVE LEATHER INDUSTRY.

FGL International, Diamond sponsor of Asian International Conference on Leather Science and Technology

16-19 October 2018, Xi'an, Shaanxi province, China

FGL International is proud to be one of the Diamond sponsors of the “11th Asia International Conference of Leather Science and Technology (AICLST)”, hosted by the China Leather Industry Association (CLIA) and organized by Shaanxi University of Science and Technology (SUST) in the city of Xi'an, Shaanxi province, China on 16th - 19th Oct. 2018. The conference will provide a sophisticated scientific/technical lecture in various forms of presentations,

the invited and contributed oral presentations, and poster presentations on display, focusing on the theme of “Science and technology innovation boosts the transformation and development of global leather industry” and covering very important topics. FGL International is constantly investing in our Research and Development programs, our laboratories and our personnel, to meet and surpass the ever more challenging demands of today's Environmental protection and

Ecological Sustainability. Just for this reason, given the importance and the actuality of the issues covered by the conference, FGL International has decided to present its own study realized in collaboration with the CNR of Sassari entitled “Circular Economy: the Green Way for Tanning”.

FGL International is joining the Zero Discharge of Hazardous Chemicals ZDHC

FGL International is pleased to announce it is joining the Zero Discharge of Hazardous Chemicals (ZDHC) Programme and in doing so, supports the Programme's vision of widespread implementation of sustainable chemistry and best practices in the chemical industries to protect consumers, workers and environment. FGL International commits to working collaboratively on

this task and towards the milestones set in the Programme's Joint Roadmap through active engagement with other brands, retailers and stakeholders. FGL International is proud to be joining over 20 leading brands working together to drive industry-wide change in responsible chemicals management, and commits to working on this task in a collaborative and open manner.

Leading the textile, leather and footwear industries towards zero discharge of hazardous chemicals

FGL International

Auxiliary chemical tanning products with a high added value.

FGL International produces auxiliary chemical tanning products with a high added value. A passion for new solutions to improve the tannery sector, the unquestionable technical skills of its professionals, the experience built-up in the field, a highly qualified R&D department and dedicated on-site service are what have led leather manufacturers to choose FGL International as their ideal business partner. FGL International has a flexible production structure composed of qualified professionals designed to operate efficiently on the various international markets. Management of the departments is fully computerised and complies with UNI EN ISO 9001:2008 standards for which the company has been certified since 1999. This system controls every aspect of business from administration to

marketing, research, production, warehouse inventories and customer assistance while also assuring safety in the workplace. Flexibility is the key feature based on 2 basic principles:

- 1) **The availability of a fully-stocked warehouse**
- 2) **The ability to satisfy customer's needs promptly, all over the world**
