

FGL International strongly believes in innovation and in new generations. FGL International has implemented a continuous in-house personnel training process which is considered the key factor for the success of the company. Matteo is one of the young technicians of the experimental tanning department; he is representing the new-coming technologies and the new technical staff of the future of FGL International. He is trained side by side with high skilled experienced technicians of FGL International in order to give the right chance of continuity for the future and respecting the tradition of company.

FGL INTERNATIONAL LOVES TANNERY

WE CARE ABOUT LEATHER
SO MUCH THAT WE TRAIN
OUR STAFF TO BECOME THE
BEST SPECIALIST IN EACH PART
OF THE TANNING PROCESS.

Awarded the eco-friendly research done by FGL International

FGL International has always been focused in the research of “ecofriendly” products and processes.

Eligio Stoppa and Franca Nuti

The ecology, the environment and all the problems related to keep it sustainable, led the tanning industry to face major changes in the last period.

For this reason, the subjects of papers presented at the A.I.C.L.S.T. 2012 (Taipei, November 12th - 14th 2012), which takes place every two years with the support of I.U.L.T.C.S., were based especially on ecological and economic processes for the whole leather industry.

FGL International has always been focused in the research of “ecofriendly” products and processes. During the event, FGL International had the honor to present its paper developed together the University of Pisa and Archa Laboratories. FGL International is, and always be, focused on researches concerning green and sustainable processes in order to be able to offer products that comply with the most updated environmental rules in the leather business.

Development and use of innovative dyeing process for metal-free leather.

FGL International

Auxiliary chemical tanning products with a high added value.

FGL International produces auxiliary chemical tanning products with a high added value. A passion for new solutions to improve the tannery sector, the unquestionable technical skills of its professionals, the experience built-up in the field, a highly qualified R&D department and dedicated on-site service are what have led leather manufacturers to choose FGL International as their ideal business partner. FGL International has a flexible production structure composed of qualified professionals designed to operate efficiently on the various international markets. Management of the departments is fully computerised and complies with UNI EN ISO 9001:2008 standards for which the company has been certified since 1999. This system controls every aspect of business from administration to

marketing, research, production, warehouse inventories and customer assistance while also assuring safety in the workplace. Flexibility is the key feature based on 2 basic principles:

- 1) **The availability of a fully-stocked warehouse**
- 2) **The ability to satisfy customer's needs promptly, all over the world**
